

**Surfa Slick Magnesium Asphalt Lutes** are rugged and are 33% lighter than the old style aluminum lutes that require cross braces. Our lutes have the spring of steel and are highly abrasive resistant, rust proof and 100% recyclable. Our handle to bar connection bracket is made from aircraft quality aluminum and only requires 4-bolts for quick assembly. The design of the bars allows material to pass through without jamming All of us a Surfa Slick remain committed to providing the best in asphalt lute products, so when you think of lutes, please think of **Surfa Slick**.
