

Grab Hook GG with Locking Pin

Our well known GG clevis grab hook is now available with a chain locking pin. The grab hook has supporting cradle lugs which allows it to be used at full WLL. The design is optimized for ideal function, high strength and light weight. The chain locking pin is made out of stainless steel and allows for easy handling and minimizes the risk of accidental release of the chain when not under load - a great feature particularly for in-line shortener and lashing applications.

Specifications

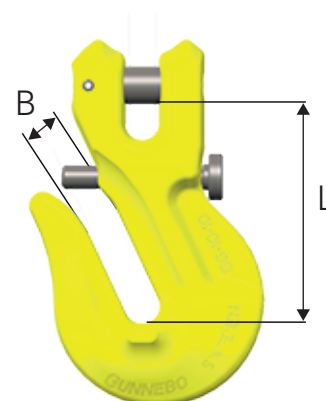

Standards:	Finish:	Documentation:
- EN 1677 WLL +25% - ASTM A952/A952M-02 - ASTM A906/A906M-02 - AS3776:2015	GrabiQ yellow powder coated.	Product certificate according to EN 10204-3.1, raw material certificate on request.
Material:	Temperature range:	Safety factor:
High Tensile Steel, Quenched and Tempered, Grade 10/100.	-40 °C to 200 °C	4:1 100% proof tested

Grab Hook GG with Locking Pin
